TRANSACTIONS OF THE ASME

Volume 90, 1968

Published quarterly in six Journals

Code	Journal of	Published in
AM	Applied Mechanics (Volume 35) Series E	March (pp. 1-208), June (pp. 209-432), September (pp. 433-624), December (pp. 625-848)
B	Basic Engineering Series D	March (pp. 1-142), June (pp. 143-318), September (pp. 319-434), December (pp. 435-640)
HT	Heat Transfer Series C	February (pp. 1-182), May (pp. 183-282), August (pp. 283-370), November (pp. 371-494)
I	Engineering for Industry Series B	February (pp. 1-196), May (pp. 197-424), August (pp. 425-530), November (pp. 531-750)
L	Lubrication Technology Series F	January (pp. 1-332), April (pp. 333-524), July (pp. 525-662), October (pp. 663-862)
P	Engineering for Power Series A	January (pp. 1-96), April (pp. 97-212), July (pp. 213-308), October (pp. 309-395)

(A) Abstract (AC) Author's Closure (BR) Book Review (C) Correspondence (D) Discussion

A

ABBOTT, D. E.
Investigation of a method for the general analysis of time dependent two-dimensional laminar boundary layers .....B 563
ABRASION. *See* WEAR
ABRASIVE CUTOFF. *See* GRINDING
ABRASIVE MACHINING. *See* GRINDING
ACCELEROMETERS
Step-bearing accelerometer with pneumatic signal output, a .....L 761
ACHENBACH, J. D.
Continuum theory for a laminated medium .....AM 467
On the vibrations of a laminated body ..AM 689
Time-harmonic waves in a stratified medium propagating in the direction of the layering .....AM 408
ACKROYD, J. A. D.
Investigation of a method for the general analysis of time dependent two-dimensional laminar boundary layers (D) ....B 570
ACOSTA, A. J.
Quasi two-dimensional flows through a cascade .....P 119
Two models for cavity flow, a theoretical summary and application (D) .....B 634
ADAMS, C. R.
Design of partly grooved, externally pressurized journal bearings, the (D) .....L 310
ADAMS, J. A.
Partial pressure measurements on a subliming organic surface .....HT 482
ADAMS, R. B.
Accuracy of the taut-line position-indicator for offshore drilling vessels .....I 161
ADELBERG, M.
Evaluation of constants for the Rohsenow pool-boiling correlation (D) .....HT 246
AERODYNAMICS
Application of controlled-vortex aerodynamics to advanced axial flow turbines, the ..P 245
Fluctuating lift forces on aerofoils moving through transverse and chordwise gusts .....AM 494
Integral analysis of turbulent reattachment applied to plane supersonic base flow, an .....I 553
Leeward surfaces in hypersonic viscous interaction .....AM 412
Nonlinear interaction of two lifting bodies in arbitrary unsteady motion .....B 387
On the calculation of unsteady nonlinear three-dimensional supersonic flow past wings .....B 581
Surface effusion drag reduction using non-Newtonian fluids .....HT 277
Three-dimensional boundary layers on cones at small angles of attack .....AM 634
Turbulent wake of a body of revolution, the .....B 275; (D) .....B 637
AEROFOILS
Fluctuating lift forces on aerofoils moving through transverse and chordwise gusts .....B 494
AHLBECK, D. R.
Digital computer simulation of railroad freight car rocking (D) .....I 706
AIR FILTERS
Self-cleaning oil bath engine intake filter for locomotive applications .....I 49
AIR POLLUTION
Mathematical model for deposition from turbulent flows, a .....P 164
AIRCRAFT ENGINES
Design of floated shoe close clearance seals for supersonic jet engine compressors ....L 500
AIRFOILS
Nonlinear interaction of two lifting bodies in arbitrary unsteady motion .....B 387
ALEXANDER, J. M.
Critical note on several comments on analyses of cold strip rolling, a (D) .....I 742
ALLEN, C. M.
Microasperity lubrication .....L 351
Performance of a modified packed-gland seal .....L 417
ALLEN, G. P.
Spiral groove face seal concepts: comparison to conventional face contact seals in sealing liquid sodium (400 to 1000 deg F) .....L 450
ALLOYS
Application of the positive thermoelastic coefficients of nickel-iron alloys to wide-temperature-range Belleville springs ....I 295
High strength nickel-base alloy with improved oxidation resistance up to 2200 deg F, a .....P 1
Unidimensional solidification of a binary eutectic system with a time-dependent surface temperature, the .....HT 27
ALTAN, T.
Numerical method for estimating the temperature distributions in extrusion through conical dies, a .....I 107
Plastic deformation of copper and steel in hot extrusion through conical dies .....I 371
ALUMINUM
Material behavior in wires of 1100 aluminum subjected to transverse impact ....AM 342
Underwater power from aluminum .....I 255
ALZHEIMER, W. E.
Nonlinear unsymmetrical bending of an annular plate .....AM 190
Transient motion of a rigid cylinder produced by elastic and acoustic waves ..AM 134
AMBA-RAO, C. L.
Vibrations of beams carrying masses (D) .....AM 845
ANDEEN, G. B.
Momentum flux in two-phase flow .....HT 211
ANDERSON, E. L.
Effects of lubricants, metals, temperature, and atmospheric environments on gear load-carrying capacity .....L 117; (AC) .....L 633
ANDERSON, J. E.
Local temperature variations of a transpiration-cooled wall due to radiant heating .....HT 146
ANDERSON, WILLIAM J.
Response of viscoelastic fluids in dynamically loaded bearings (D) .....L 559
Role of lubrication in propagation of contact fatigue cracks, the (D) .....L 630
Spinning friction coefficients with three lubricants .....L 330
ANDREEV, Y. G.
Dynamic strain aging and the Charpy specimen behavior of annealed 4340 steel ....B 13
ANDREWS, W. R.
Fatigue-crack growth-rate studies of low-alloy pressure vessel steels .....I 648
ANGELINO, G.
Carbon dioxide condensation cycles for power production .....P 287
ANNO, J. N.
Microasperity lubrication .....L 351
ANNULI
Analysis of heat transfer for fully developed turbulent flow in concentric annuli, an .....HT 43
Experimental study of the turbulent-flow boundary-layer development in smooth annuli, an (D) .....B 409
ANTUNES, F. F.
Estimating the efficiency of prototype pumps from model tests (D) .....P 301
APPELDOORN, J. K.
Effects of lubricants, metals, temperature, and atmospheric environments on gear load-carrying capacity (D) .....L 632
Present state of lubrication and its relation to rheology, the .....L 526
Response of viscoelastic fluids in dynamically loaded bearings (D) .....L 559
ARCHES
Bounds on stresses caused in sandwich arches by bounded anelastic strains ....AM 610
Dynamic snap-through of imperfect viscoelastic shallow arches .....AM 289
Finite deflections and snap-through of high circular arches .....AM 763
On the final states of shallow arches on elastic foundations subjected to dynamical loads .....AM 713
Stability of shallow arches against snap-through under timewise step loads AM 31; (D) .....AM 618
Strongest circular arch, the—a perturbation solution .....AM 476
ARCHIBALD, F. R.
Rayleigh step bearing applied to a gas-lubricated journal of finite length, the (AC) .....L 521
ARMISTEAD, R. A., JR.
Study of wall-turbulence phenomena using hot-film sensors, a .....HT 13
ARNAS, O. A.
On a new approach to slip flow using Rayleigh's problem (AC) .....AM 618
ARNDT, ROGER E. A.
Rough surface effects on cavitation inception .....B 249; (AC) .....B 633
ARNESON, H.
Design of partly grooved, externally pressurized journal bearings, the (D) .....L 310

ARWAS, E. B.
Axisymmetric perfectly flexible foil bearing with porous inlet restrictor, the (D) ..... L 640

ASHER, J. A.
Experimental investigation of the formation and flow characteristics of an impulsively generated vortex street, an ..... B 596

ASHLEY, H.
On the calculation of unsteady nonlinear three-dimensional supersonic flow past wings ..... B 581

ATKINS, A. G.
Influence of redundant work when drawing rods through conical dies, the ..... I 411

ATKINSON, C. P.
Symmetric arc solutions of $\ddot{\zeta} = \zeta^{*}$ .... AM 565

ATSUMI, A.
Thermal stresses in a circular cylinder with a ring of holes ..... AM 604

AUNG, WIN
Heat transfer by free convection from a horizontal wire to carbon dioxide in the critical region ..... HT 51

AUSLANDER, D. M.
Distributed system simulation with bilateral delay-line models ..... B 195; (AC) ..... B 412

AUSTIN, K. A.
Qualification of gas turbine engines for U. S. Navy shipboard use (D) ..... P 365

AUTOMATIC CONTROL. *See also* AUTOMOTIVE ENGINEERING
Application of distributed parameter concepts to dynamic analysis and control of bending vibrations ..... B 157
Aspects of adaptive optimal steady-state control ..... B 201
Distributed system simulation with bilateral delay-line models .... B 195; (D) .... B 412
Dynamic programming and a distributed parameter maximum principle ..... B 152
Investigation of feedback controlled diffusion systems using a high-speed continuous electrical analog ..... B 175
Mode oriented design viewpoint for linear, lumped-parameter multivariable control systems ..... B 222
Modeling and compensation of nonlinear systems using sensitivity analysis ..... B 187
New Liapunov function for nonlinear time-varying systems ..... B 208
On the optimal-control problem for dynamical processes with variable delays ..... B 181
On the stability of some linear nonautonomous random systems ..... AM 7
Optimum linear preview control with application to vehicle suspension ..... B 213

AUTOMOTIVE ENGINEERING
Active roll mode suspension system for ground vehicles, an ..... B 167
Investigations into the detergent action of additives for motor oils in the presence of an electric field ..... L 125
Low temperature evaluation of rear axle seals ..... L 439
Optimum linear preview control with application to vehicle suspension ..... B 213
Suspension dynamics by computer simulation ..... I 708

AVITZUR, B.
Analysis of central bursting defects in extrusion and wire drawing ..... I 79
Analysis of rod shaving and orthogonal cutting ..... I 393
Measurement of friction in drawing, extrusion, and rolling ..... L 72; (AC) ..... L 635

AXLES
Railroad axle design factors ..... I 33

AZER, N. Z.
Thermal entry length for turbulent flow of liquid metals in pipes with constant wall heat flux ..... HT 483

B

BABEL, H. W.
Biaxial fracture criterion for porous brittle materials, a ..... B 285

BABER, B. B.
Effects of lubricants, metals, temperature, and atmospheric environments on gear load-carrying capacity.... L 117; (AC) .... L 633

BAILEY, J. A.
Critical review of some previous work on the mechanics of the metal-cutting process ..... I 54

BAIN, J. A.
Effect of design changes in railway catenary-pantograph systems on power collection at high speed ..... I 680
Railway overhead contact systems, catenary-pantograph dynamics for power collection at high speeds ..... I 692

BAKER, L., JR.
Heat transfer from spheres into subcooled liquid sodium during forced convection ..... HT 394

BALDWIN, L. V.
Application of a simplified velocity profile to the prediction of pipe-flow heat transfer ..... HT 191

BALJÉ, O. E.
Axial cascade technology and application to flow path designs
Part I—axial cascade technology ..... P 309
Part II—application of data to flow path designs ..... P 329
Axial turbine performance evaluation
Part A—loss-geometry relationships ..... P 341
Part B—optimization with and without constraints ..... P 349

BAMBERGER, E. N.
Evaluation of lubricants for high-temperature ball bearing applications ..... L 106; (AC) ..... L 651

BARBEE, DANIEL G.
Incompressible flow induced by an infinite isothermal disk rotating in a rarefied gas ..... HT 359

BARBIN, A. R.
Bubble trajectories and equilibrium levels in vibrated liquid columns ..... B 125; (AC) ..... B 629
Experimental study of the turbulent-flow boundary-layer development in smooth annuli, an (D) ..... B 410

BARLOW, E. J.
Axisymmetric, perfectly flexible foil bearing with porous inlet restrictor, the .... L 145; (AC) ..... L 640
Flexible membrane hydrostatic air bearing (D) ..... L 633

BARNETT, M. A.
Gas-bearing turbomachinery (D) ..... L 678

BARNOSKI, R. L.
On the single highest peak response of a dual oscillator to random excitation .. AM 414

BARRY, H. F.
Friction and wear ..... L 11

BARS
Fully plastic, plane-strain tension of a notched bar, the ..... AM 111
Numerical solution for two-dimensional elastic wave propagation in finite bars (D) ..... AM 199
Torsion of composite elastic bars of arbitrary cross section ..... I 435
Wave propagation in a finite length bar with a variable cross section ..... AM 824

BASINSKI, L. R.
Performance testing of 580-mw Joliet units No. 7 and No. 8 ..... P 65

BASS, R. L.
Some correlations of theory and experiment for developing turbulent free shear layers ..... B 572

BATCHELOR, G. K. (*author*)
Introduction to fluid mechanics, an (BR) ..... AM 624

BATRA, S. K.
Contact region of a hard ball rolling on a viscoelastic plate (D) ..... L 634

BATTERMAN, S. C.
Free-edge plastic buckling of axially compressed cylindrical shells ..... AM 73; (AC) ..... AM 622

BAUER, H. F.
Interaction of a sloshing liquid with elastic containers ..... B 373
Nonlinear response of elastic plates to pulse excitations ..... AM 47

BAUMGARTEN, J. R.
Analysis of a high-speed solenoid-actuated mechanism (D) ..... I 448

BAUSCHINGER EFFECT
Effect of state-of-stress and yield criterion on the Bauschinger effect ..... B 403
Approximate solutions for impulsively loaded elastic-plastic beams ..... AM 803

BEAMS
Effects of warping rigidity and load position on the lateral stability of a simply supported beam, the ..... AM 192
Generalized hypergeometric function solutions on the transverse vibration of a class of nonuniform beams (D) ..... AM 194
On the dynamic response of a beam to a randomly moving load ..... AM 1
Plane anisotropic beams (D) ..... AM 622; (errata) ..... AM 623
Timoshenko beam with a moving load, the ..... AM 481
Vibrations of beams carrying masses (D) ..... AM 845

BEARINGS. *See also* LUBRICATION
Air-bearing applications to machine tools and measuring instruments ..... L 680
Application of gas-lubricated bearings to instruments ..... L 731
Area of contact between rough surfaces and flats, the (D) ..... L 521
Asymptotic methods for an infinitely long slider squeeze-film bearing L 173; (D) L 637
Axisymmetric, perfectly flexible foil bearing with porous inlet restrictor, the ..... L 145; (D) ..... L 640
Bearing area of surfaces, the ..... L 329
Boundary conditions of a viscous flow between surfaces with rolling and sliding motion ..... L 254
Bounded variable approach to the optimum slider bearing, a ..... L 240
Calculation of stiffness and damping properties of gas bearings ..... L 793
Compressibility effects on the infinitely wide, perfectly flexible foil bearing ..... L 221
Considerations of flow across a bearing groove ..... L 312; (D) ..... L 660
Contact region of a hard ball rolling on a viscoelastic plate ..... L 101; (D) ..... L 634
Design of partly grooved, externally pressurized journal bearings, the ..... L 305
Design studies of an opposed-hemisphere gyro spin-axis gas bearing ..... L 753
Developments in supercleaning and boundary lubrication for gas-bearing gyros related to surface phenomena ..... L 850
Dynamic capacity of oscillating rolling element bearings ..... L 130; (D) ..... L 647
Dynamic properties of the oil film in lubricated bearings, the ..... L 320
Effect of viscous and pressure gradient torques on a free-rotor gyroscope, the ..... L 769
Effects of thermal expansion in the infinitely wide slider bearings, the—free thermal expansion ..... L 233
Effects of viscoelastic lubricant on squeeze film lubrication between impinging spheres ..... L 113; (D) ..... L 649
Evaluation of lubricants for high-temperature ball bearing applications ..... L 106; (D) ..... L 650
Experimental study of elastohydrodynamic lubrication of foil bearings, an ..... L 199
Experimental study of turbulent flow in a spiral-groove configuration, an ..... L 443
Externally pressurized bearings—II: vibration attenuators ..... L 614
Flexible membrane hydrostatic air bearing ..... L 184; (D) ..... L 633
Forced cooling of a slider bearing with wedge film ..... L 297; (D) ..... L 652
Gas-bearing turbomachinery ..... L 665
Identification of potential failure nuclei in rolling contact fatigue (D) ..... B 628
Investigation of externally pressurized steam-lubricated journal bearing ..... L 723
Investigation of methods to improve the wear resistance of gas-bearing ceramic materials, an ..... L 829
Investigation of permanent deformation (brinelling) of ball and roller specimens, an ..... L 618
Load support of the squeeze-film journal bearing of finite length ..... L 157; (D) ..... L 655
Lubrication review: a digest of the literature for 1966 ..... L 1
Material combinations for hydrodynamic inert gas-lubricated bearings ..... L 49
Material considerations for high temperature tilting pad gas bearings ..... L 818
Numerical solution for the design of externally pressurized porous gas bearings, a: thrust bearings ..... L 810
Numerical solution of linear elliptic equations, the ..... L 773
On error torques of squeeze-film cylindrical journal bearings .... L 191; (D) ..... L 659
On the behavior of grooved plate thrust bearings with compressible lubricant .... L 226

BEARINGS (*Continued*)
On the load capacity of the MHD journal bearing ....L 139
One-dimensional optimum hydrodynamic gas slider bearing, the .... L 281; (D) ....L 654
Pivoted-pad journal gas bearing performance in exploratory operation of Brayton cycle turbocompressor ....L 687
Rayleigh step bearing applied to a gas-lubricated journal of finite length, the (D) ....L 520
Rayleigh step journal bearing: part 1—compressible fluid ....L 271
Response of viscoelastic fluids in dynamically loaded bearings ....L 555
Review of gas-bearing gyro development in the United Kingdom ....L 741
Review of numerical methods in gas bearing film analysis ....L 777
Semi-implicit numerical methods for treating the time-transient gas-lubrication equation ....L 153; (D) ....L 645
Some problems in high-temperature bearing materials ....L 841
Stability considerations for a gas-lubricated tilting-pad journal bearing—part 1: analytical methods ....L 162; (D) ....L 639
Steady-state and dynamic properties of the floating-ring journal bearing ....L 243; (D) ....L 661
Step-bearing accelerometer with pneumatic signal output, a ....L 761
Study of high speed machines with rubber stabilized air bearings, a ....L 701
Survey of gas-lubricated porous bearings, a ....L 804
Work of thrust bearings with spiral grooves cut on the force pump rotor ..L 697

BECK, J. V.
Load support of the squeeze-film journal bearing of finite length ..L 157; (AC) ..L 659

BECKMAN, W. A.
Radiation and convection heat transfer in a porous bed ....P 51

BELLEVILLE SPRINGS. *See* SPRINGS

BELYTSCHKO, T.
Numerical methods for the limit analysis of plates ....AM 796

BENDER, E. K.
Optimum linear preview control with application to vehicle suspension ....B 213

BENDING. *See also* STRESSES AND STRAINS
In-plane bending of curved circular tubes ....I 666
Nonlinear unsymmetrical bending of an annular plate ....AM 190
Pure bending of shallow helicoidal shells ....AM 387

BENTON, EDWARD R.
Unsteady rotating flow in a cylinder with a free surface (D) ....B 452

BERENS, A. S.
Low temperature evaluation of rear axle seals ....L 489

BERENSON, P. J.
General heat transfer correlation for annular flow condensation, a ....HT 267

BERGER, B. S.
Inversion of the Laplace transform with applications to the vibrations of continuous elastic bodies, the ....AM 837
Vibration of semi-infinite cylindrical shells ....AM 178

BERGLES, A. E.
Critical-heat-flux and flow-pattern observations for low-pressure water flowing in tubes (AC) ....HT 280
Evaluation of constants for the Rohsenow pool-boiling correlation (D) ....HT 246

BERGLUND, JERRY W.
Interaction of a ring-reinforced shell and a fluid medium ....AM 139

BERMAN, I.
Shell theory solution for asymmetric balanced radial loads on long cylinders ....P 177

BERND, L. H.
Normal stresses at high shear rates in a polymer solution ....L 561

BERRY, D. G.
Von Karman hydraulic vortexes cause stay vane cracking on propeller turbines at the Little Long generating station of Ontario Hydro ....P 213

BERT, C. W.
Analysis of the propagation of plane elastic plastic waves at finite strain (D) ..AM 427
Ductile creep rupture of shells with strain hardening and time-dependent loading .... B 297; (errata) ....B 639
Effects of anisotropy in axisymmetric cylindrical shells (D) ....AM 195
Orthotropic annular disks in plane stress (D) ....AM 848

BERTHOLF, L. D.
Numerical solution for two-dimensional elastic wave propagation in finite bars (AC) ....AM 199

BEVIER, W. E.
Externally pressurized bearings—II: vibration attenuators ....L 614

BIENIECKI, H. S.
Suspension dynamics by computer simulation ....I 708

BIJLAARD, P. P.
Thermal stress analysis of nonuniformly heated cylindrical shell and its application to a steam generator membrane wall ....P 73; (AC) ....P 300

BINSLEY, R. L.
Axial turbine performance evaluation
Part A—loss-geometry relationships ....P 341
Part B—optimization with and without constraints ....P 349

BIOMECHANICS
Method of determining some distensible tube properties, a ....B 133

BIOTECHNOLOGY
Effect of a time-dependent stenosis on flow through a tube ....I 248
On the dynamics of the human body in free fall ....AM 167
Peristaltic transport ....AM 669
Viscoelastic properties of soft tissue by discrete model characterization ....I 239

BIRD, J.
Short transverse properties of certain high-strength steel ....I 627

BJERKLIE, J.
Design of floated shoe close clearance seals for supersonic jet engine compressors ..L 500

BLACK, W. Z.
Study of directional radiation properties of specially prepared V-groove cavities, a ....HT 420

BLOOMFIELD, W.
Qualification of gas turbine engines for U. S. Navy shipboard use (D) ....P 365

BOBB, F. H.
Underwater power from aluminum ....I 255

BOBROWSKY, A.
Measurement of friction in drawing, extrusion, and rolling (D) ....L 634

BODGER, W. K.
Axial cascade technology and application to flow path designs. Part II—application of data to flow path designs (D) ....P 340
Axial performance evaluation. Part B—optimization with and without constraints (D) ....P 359

BOGIE, K. D.
Nonlinear response of soap and synthetic base greases ....L 592

BOGY, DAVID B.
Edge-bonded dissimilar orthogonal elastic wedges under normal and shear loading ....AM 460

BOILERS. *See also* CORROSION AND DEPOSITS
Research study on internal corrosion of high-pressure boilers, a ....P 21
Thermal stress analysis of nonuniformly heated cylindrical shell and its application to a steam generator membrane wall ....P 73; (D) ....P 298

BOILING
Calculation of steam volume fraction in subcooled boiling ....HT 158
Dispersed flow film boiling ....HT 399
Evaluation of constants for the Rohsenow pool-boiling correlation ....HT 239
Incipient boiling superheats in liquid metals ....HT 303
Interacting effects of geometry and gravity upon the extreme boiling heat fluxes ..HT 180
Nucleate pool boiling of nitrogen with different surface conditions ....HT 437
Pool boiling on polished and chemically etched stainless-steel surfaces ....HT 231
Study of bubble departure in forced-convection boiling, a ....HT 223
Study of the temperature profiles measured in the thermal sublayer of water, Freon-113, and methyl alcohol during pool boiling, a ....HT 347
Transient film boiling of water on a horizontal wire ....HT 476
Void fraction in subcooled boiling—prediction of the initial point of net vapor generation, the ....HT 151

BOLEV, B. A.
Propagation of discontinuities in coupled thermoelastic problems ....AM 489

BOOK REVIEWS
Boundary layer theory (BR) ....AM 846
Hydraulic control systems (BR) ....AM 200
Introduction to fluid mechanics, an (BR) ....AM 624
Mechanics of continua (BR) ....AM 846
Theoretical hydrodynamics (BR) ....AM 846
Theory of orbits: the restricted problem of three bodies (BR) ....AM 624
Thin elastic shells (BR) ....AM 624
Variational method in engineering, the (BR) ....AM 200

BOOTHROYD, G.
Critical review of some previous work on the mechanics of the metal-cutting process ....I 54

BORGEAUD, G.
New electric locomotive type Re 4/4^{II} of the Swiss federal railways and the problems related to the development of its mechanical part, the ....I 13

BORNHORST, W. J.
Analysis of a liquid vapor phase change by the methods of irreversible thermodynamics (AC) ....AM 621

BOTANY
Convection heat transfer from broad leaves of plants ....HT 71

BOTTS, J. A.
Bubble trajectories and equilibrium levels in vibrated liquid columns ....B 125; (AC) ....B 629

BOUNDARY LAYERS
Analysis of the formation of turbulent patches in the transition boundary layer, an ....AM 216
Approximate analysis of transient laminar boundary-layer development ....HT 452
Boundary layer theory (BR) ....AM 846
Effects of streamwise vortices on laminar boundary-layer flow ....AM 424
Equilibrium temperatures in a boundary-layer flow over a flat plate of absorbing-emitting gas ....HT 257
Experimental study of the turbulent-flow boundary-layer development in smooth annuli, an (D) ....B 409
Investigation of a method for the general analysis of time dependent two-dimensional laminar boundary layers ....B 563
Similarity solutions of laminar, incompressible boundary layer equations of non-Newtonian fluids ....B 71; (D) ....B 427
Some correlations of theory and experiment for developing turbulent free shear layers ....B 572
Some properties of laminar boundary layers on curved surfaces ....B 301; (errata) ....B 430
Study of incompressible turbulent boundary layers in channel flow, a ....B 455
Theory of a thermal fluxmeter in a shear flow (D) ....AM 427
Three-dimensional boundary layers on cones at small angles of attack ....AM 634

BOWERMAN, R. D.
Estimating the efficiency of prototype pumps from model tests (D) ....P 301

BOWLUS, D. A.
Incompressible turbulent flow in the inlet region of a pipe ....B 431

BOYD, K. E.
Laminar inward flow of an incompressible fluid between rotating disks, with full peripheral admission ....AM 229

BRADY, J.
Seal technology assures reliability ....L 484

BRAKES
Consequences of spline friction in multiple disk brake and clutch packs, the ....L 65
Spline friction in multiple disk brake and clutch packs (D) ....L 653

BRENNAN, J. F.
Method of estimating the optimum mean life of plant groups, a ....I 601

BRETTMAN, K. F.
Temperature distributions in laminar flat plate shear flow ....HT 32

BRIGGS, C. W.
Study of the notch effect and of specimen design and loading on the fatigue properties of cast steel, a ....B 51; (AC) ....B 411

BRIGHTON, J. A.
Incompressible turbulent flow in the inlet region of a pipe ....B 431

BRILLER, R.
Gas solids suspension convective heat transfer at a Reynolds number of 130,000 ..HT 464
BRINK, R.
Seal technology assures reliability .....L 484
BRITTAIN, T. M.
Investigation of analog materials for the study of deformations in metal processing simulations, an .....I 381
BROADWAY, J. A.
Mathematical model for deposition from turbulent flows, a .....P 164
BROCKLEY, C. A.
Time-dependence of static friction, the ....L 35
BROGAN, W. L.
Dynamic programming and a distributed parameter maximum principle .....B 152
BROTHERS, A. J.
Fatigue-crack growth-rate studies of low-alloy pressure-vessel steels .....I 648
Influence of notches on mechanical behavior at elevated temperatures, the: some metallographic observations .....B 37
BROWN, F. T.
Frequency dependent friction in transient pipe flow (D) .....B 413
BROWN, J.
Digital computer simulation of railroad freight car rocking (D) .....I 706
BROWN, J. M.
Oil seal quality control—important or imperative .....L 463
BROWN, R. J.
Water-column separation at two pumping plants .....B 521
BRUNER, J. P.
Effect of design variation on service stresses in railroad wheels ....I 187; (AC) ....I 748
BUBBLES. *See also* CAVITATION
Behavior of a spherical bubble in the vicinity of a solid wall, the .....B 75; (D) .....B 418
Bubble growth and collapse in liquid nitrogen .....HT 22; (D) .....HT 369
Bubble trajectories and equilibrium levels in vibrated liquid columns .....B 125; (D) .....B 629
Dynamics of moving gas bubbles in injection cooling .....HT 371
Study of bubble departure in forced-convection boiling, a .....HT 223
BUCKLING
Axially symmetric creep buckling of circular cylindrical shells in axial compression .....AM 530
Buckling and initial postbuckling behavior of oval cylindrical shells under axial compression .....AM 66

ENGINES, DIESEL
Developing a high-powered diesel engine for railway traction ..... P 375
Spectrographic sampling method for quick assessment of cylinder and piston ring wear, a ..... I 43

ENGINES, GAS TURBINE
Design of floated shoe close clearance seals for supersonic jet engine compressors .. L 500

ENGINES, STIRLING CYCLE
Mathematical model for steady operation of Stirling-type engines, a ..... P 45

ERDOGAN, F.
Effect of mean stress on fatigue crack propagation in plates under extension and bending, the (AC) ..... B 417

ERINGEN, A. CEMAL (*author*)
Mechanics of continua (BR) ..... AM 846

ERWIN, J. R.
Experimental program to provide two-dimensional cascade data applicable to pump design, an (D) ..... P 305

ESCHWEILER, J. C.
Liquid rocket engine feed system dynamics by the method of characteristics ..... I 561

ESHEL, A.
Compressibility effects on the infinitely wide, perfectly flexible foil bearing .... L 221
Dynamic behavior of a foil in the presence of a lubricating film ..... AM 242

ESHGHY, S.
Thermal aspects of the abrasive cutoff operation. Part 2—partition functions and optimum cutoff ..... I 360

ESIN, A.
Microplastic strain energy criterion applied to fatigue, the ..... B 28

ESSENBURG, F.
Effects of anisotropy in axisymmetric cylindrical shells (AC) ..... AM 195

ETTLES, C. M. M.
Considerations of flow across a bearing groove ..... L 312; (AC) ..... L 660

EVANS, J. E., III
Analysis of three-fluid, crossflow heat exchangers (D) ..... HT 338

EVANS, L. B.
Radiative transfer in anisotropically scattering media: allowance for Fresnel reflection at the boundaries ..... HT 56

EVANS, W.
Measurement of friction in drawing, extrusion, and rolling ..... L 72; (AC) ..... L 635

EVAPORATION
Evaporation of water droplets in superheated steam, the ..... HT 445
Theoretical model for predicting the transient response of the mixture-vapor transition point in horizontal evaporating flow ..... HT 165

EVAPORATORS
Heat transfer in an LTV falling film evaporator: a theoretical and experimental analysis ..... HT 201

EVERETT, WILLIAM S.
Investigation of pulsations in the boiler feed system of a central power station, an (D) ..... B 617

EXTRUSION. *See also* METAL WORKING
Analysis of central bursting defects in extrusion and wire drawing ..... I 79
Numerical method for estimating the temperature distributions in extrusion through conical dies, a ..... I 107
Radial flow velocity field for predicting upper-bound solutions for plane strain extrusion ..... B 45; (D) ..... B 419

F

FABULA, A. G.
Turbulent flow of dilute aqueous polymer solutions (D) ..... B 626

FALKENHAGEN, G. L.
Displacement and velocity kinematic synthesis ..... I 527

FANNELOP, T. K.
Effects of streamwise vortices on laminar boundary-layer flow ..... AM 424

FANS
Testing pumps as fans and fans as pumps ..... P 140

FARNSWORTH, A. V., JR.
Unsteady laminar motion of a Newtonian fluid contained between concentric rotating cylinders ..... AM 419

FARRIS, G. J.
Potential vortex flow adjacent to a stationary surface ..... AM 209

FATIGUE, *See also* METAL FATIGUE
Effect of mean stress on fatigue crack propagation in plates under extension and bending, the (D) ..... B 414
Fatigue-crack growth-rate studies of low-alloy pressure-vessel steels ..... I 648
Identification of potential failure nuclei in rolling contact fatigue (D) ..... B 628
Microplastic strain energy criterion applied to fatigue, the ..... B 28
Prediction of low-cycle fatigue life of specimens with fabrication flaws ..... I 620
Study of the notch effect and of specimen design and loading on the fatigue properties of cast steel, a ..... B 51; (D) ..... B 411

FAUSKE, H. K.
Critical-heat-flux and flow-pattern observations for low-pressure water flowing in tubes (D) ..... HT 280
Momentum flux in two-phase flow (D) .. HT 220

FEILBACH, W. H., JR.
Analysis of central bursting defects in extrusion and wire drawing (D) ..... I 90
Analysis of rod shaving and orthogonal cutting ..... I 393

FEIN, RICHARD S.
Present state of lubrication and its relation to rheology, the (D) ..... L 540
Significant rheological characteristics of lubricants, the (D) ..... L 540

FENTON, R. G.
Radial flow velocity field for predicting upper-bound solutions for plane strain extrusion ..... B 45; (AC) ..... B 419

FERNANDEZ, S. O.
Stress analysis of unnotched C-rings used for stress cracking studies ..... I 147

FIBER GLASS
Dynamics of a heated free jet of variable viscosity liquid at low Reynolds numbers, the ..... B 343

FIELD, M.
Computerized determination and analysis of cost and production rates for machining operations. Part 1—turning ..... I 455

FILA, L. J.
Numerical solution for the interaction of a moving shock wave with a turbulent mixing region ..... AM 220

FILM COOLING. *See also* COOLING SYSTEMS
Film cooling with injection through holes: adiabatic wall temperatures downstream of a circular hole ..... P 384
Heat transfer with film cooling near nontangential injection slots ..... P 157

FILMS
Electrohydrodynamic ridge instability of a thin film flowing down an inclined plate ..... HT 135
Laminar film condensation on surfaces normal to body or inertial forces ..... HT 178

FINDLAY, J. A.
Cavitation in mechanical face seals ..... L 356

FINITE ELEMENT METHOD
Convergence of the finite element method in the theory of elasticity ..... AM 274

FINKIN, EUGENE F.
Bearing area of surfaces, the ..... L 329
Consequences of spline friction in multiple disk brake and clutch packs, the ..... L 65
On the mechanism of contact between metal surfaces: part 2—the real area and the number of the contact points (D) ..... L 640
Spline friction in multiple disk brake and clutch packs (AC) ..... L 654

FINS. *See also* HEAT TRANSFER
Errors in the one-dimensional fin solution ..... HT 175

FIORI, M. P.
Critical-heat-flux and flow-pattern observations for low-pressure water flowing in tubes (AC) ..... HT 280

FLANGES
Flat face flanges with metal-to-metal contact beyond the bolt circle ..... P 82; (D) ..... P 296

FLOM, D. G.
Present state of lubrication and its relation to rheology, the (D) ..... L 541
Significant rheological characteristics of lubricants, the (D) ..... L 541

FLORENCE, A. L.
Dynamic plastic buckling of cylindrical shells in sustained axial compressive flow ..... AM 80

FLORIO, P. J., JR.
Development of a periodic flow in a rigid tube ..... B 395

FLORSCHUETZ, L. W.
Bubble growth and collapse in liquid nitrogen (D) ..... HT 369

FLOW GENERATORS
Oscillating rectilinear fluid flow generator ..... AM 663

FLOW MEASUREMENT
Note of flow rate measurements of nonuniform flows, a ..... B 313

FLOW OF FLUIDS. *See also* AERODYNAMICS; FLUID MECHANICS; JETS
Analysis of heat transfer for fully developed turbulent flow in concentric annuli, an ..... HT 43
Analysis of the formation of turbulent patches in the transition boundary layer, an ..... AM 216
Analytical study of separated flow about circular cylinders, an ..... B 511
Approximate analysis of transient laminar boundary-layer development ..... HT 452
Asymptotic solution for laminar flow of an incompressible fluid between rotating disks, an ..... AM 155
Average volumetric concentration in two-phase flow through rectangular channels ..... HT 491
Boundary conditions of a viscous flow between surfaces with rolling and sliding motion ..... L 254
Boundary effects in wake flow ..... AM 571
Column separation accompanying liquid transients in pipes (D) ..... B 627
Combined free and forced laminar convection in a horizontal tube with uniform heat flux ..... HT 353
Comparison of two impulsive incompressible laminar flows between parallel planes ..... AM 183
Convective instabilities in fully developed flows ..... HT 84
Critical-heat-flux and flow-pattern observations for low-pressure water flowing in tubes (D) ..... HT 280
Decay of turbulent axisymmetrical free flows with rotation (D) ..... AM 844

Behavior of viscoelastic media under small sinusoidal oscillation superposed on finite strain ..... AM 433
GOLDENBERG, E.
Mode oriented design viewpoint for linear, lumped-parameter multivariable control systems ..... B 222
GOLDHOFF, R. M.
Influence of notches on mechanical behavior at elevated temperatures, the: some metallographic observations ..... B 37
GOLDSCHMIDT, V. W.
Hydroelastic forces on bluff cylinders ..... B 378
GOLDSTEIN, P.
Research study on internal corrosion of high-pressure boilers, a ..... P 21
GOLDSTEIN, R. J.
Film cooling with injection through holes: adiabatic wall temperatures downstream of a circular hole ..... P 384
Film cooling with normal injection into a supersonic flow ..... I 584
Heat transfer by free convection from a horizontal wire to carbon dioxide in the critical region ..... HT 51
GOLDSTEIN, S. R.
Differential pulse-length modulated pneumatic servo utilizing floating-flapper-disk switching valves, a ..... B 143
GOLDWAG, E.
Von Karman hydraulic vortexes cause stay vane cracking on propeller turbines at the Little Long generating station of Ontario Hydro ..... P 213
GOLLER, H.
Unsteady rotating flow in a cylinder with a free surface ..... B 445
GOODIER, J. N.
Dynamic plastic buckling of cylindrical shells in sustained axial compressive flow ..... AM 80
GORDON, J. L.
Speed regulation study for Bay d'Espoir hydroelectric generating station (D) .... B 421
GOREN, Y.
Turbulent flow of dilute aqueous polymer solutions (AC) ..... B 627
GORMLEY, J. F.
On the stresses near an oblique elliptical aperture in a large plate ..... B 295
GRANVILLE, P. S.
Surface effusion drag reduction using non-Newtonian fluids (D) ..... HT 494
GRAY, R. T.
Effect of design changes in railway catenary-pantograph systems on power collection at high speed ..... I 680
GREASES. *See* LUBRICATION
GREENSPAN, H. P.
Unsteady rotating flow in a cylinder with a free surface (D) ..... B 453
GREIF, RALPH
Heat transfer by combined conduction and radiation between concentric spheres separated by radiating medium (D) ..... HT 255
High temperature thermal conductivity of rare gases and gas mixtures (D) ..... HT 324
Nongray radiation heat transfer in the optically thin region ..... HT 363
GRIFFITH, P.
Analytical and experimental study of air-lift pump performance, an (D) ..... P 110
Momentum flux in two-phase flow ..... HT 211
Study of bubble departure in forced-convection boiling, a (D) ..... HT 230
GRINDING
Design of surface grinding dynamometers ..... I 127
Forces and force ratios in grinding with coated abrasives ..... I 407
Shaft surface finish is an important part of the sealing system ..... L 375
Thermal aspects of the abrasive cutoff operation. Part 2—partition functions and optimum cutoff ..... I 360
Wheel wear and metal removal mechanisms in vertical spindle abrasive machining of mild steel, the ..... I 365
GROSS, J. H.
Effect of state-of-stress and yield criterion on the Bauschinger effect ..... B 403
GROUND-EFFECT MACHINES
Flexible membrane hydrostatic air bearing ..... L 184; (D) ..... L 633
GUINS, S. G.
Effects of the lateral instability of high center of gravity freight cars, the (D) I 735
GULATI, S. T.
Effects of anisotropy in axisymmetric cylindrical shells (AC) ..... AM 195
GULBRANSEN, L. B.
Flow stress of 6061 AL alloy composites ..... B 292
New method to measure the microresidual stress-field around inclusions, a ..... B 620
GUNN, J. C.
Laminar free convection from a downward-projecting fin ..... HT 63
GYROSCOPES
Design studies of an opposed-hemisphere gyro spin-axis gas bearing ..... L 753
Developments in supercleaning and boundary lubrication for gas-bearing gyros related to surface phenomena ..... L 850
Effect of viscous and pressure gradient torques on a free-rotor gyroscope, the L 769
Gyroscopic drifts associated with rotational vehicle vibrations ..... AM 553
Review of gas-bearing gyro development in the United Kingdom ..... L 741

H

HAAK, R. P.
Effect of state-of-stress and yield criterion on the Bauschinger effect ..... B 403
HABERSTROH, R. D.
Application of a simplified velocity profile to the prediction of pipe-flow heat transfer ..... HT 191
HAHN, E. J.
Effects of thermal expansion in infinitely wide slider bearings, the—free thermal expansion ..... L 233
HAJI-SHEIKH, A.
Transient and steady heat conduction in arbitrary bodies with arbitrary boundary and initial conditions ..... HT 103

Dynamics of moving gas bubbles in injection cooling ....HT 371
TOMICH, J. F.
Vapor-liquid separation at supersonic velocities ....I 609; (AC) ....I 745
TOOLS
Electron diffraction study of the oxide formed on cemented tungsten carbide-titanium carbide cutting tools, an ....I 92
TOPAKOĞLU, H. C.
Heat transfer for laminar flow in a curved pipe ....HT 313
TORI
On the linear bending theory of a pressurized torus ....AM 160
TORSION. *See* STRESSES AND STRAINS
TRAINS. *See* RAILROAD MECHANICAL ENGINEERING
TRANSIT SYSTEMS. *See also* RAILWAY EQUIPMENT
Active roll mode suspension system for ground vehicles ....B 167
TRANSMISSION LINES
Numerical solutions of transients in pneumatic networks—transmission-line calculations ....AM 588
TREFETHEN, L.
On real fluid flow over yawed circular cylinders (D) ....B 629
TRIANGLES
Steady-state temperature in a triangle ..HT 365
TROTTER, F. J. DEB.
Turbulent natural convection from a vertical surface (D) ....HT 494
TRUMPLER, P. R.
Dynamics of synchronous-precessing turborotors with particular reference to balancing: part 2—application ....AM 25
TSAO, S.
Numerical solutions of transients in pneumatic networks—transmission-line calculations ....AM 588
TSO, W. K.
Parametric torsional stability of a bar under axial excitation ..AM 13; (AC) ..AM 841
TSUI, TIEN-YU
Wave propagation in a finite length bar with a variable cross section ....AM 824

TSUKIZOE, T.
On the mechanism of contact between metal surfaces: part 2—the real area and the number of the contact points .....L 81; (AC) ..... L 641

TUBE PIERCING. *See* METAL WORKING

TUBES
Development of a periodic flow in a rigid tube ..... B 395
Elastic stability of circular tubes of circumferentially variable thickness under external pressure ..... I 644
Experimental investigation of possible methods to reduce laminar entry lengths, an ..... B 134
In-plane bending of curved circular tubes ..I 666
Method of determining some distensible tube properties, a ..... B 133

TULL, H. G., III
Three-dimensional kinematic synthesis ....I 481

TUPPENY, W. H.
Thermal stress analysis of nonuniformly heated cylindrical shell and its application to a steam generator membrane wall (D) ..... P 298

TURBINES
Application of controlled-vortex aerodynamics to advanced axial flow turbines, the ..... P 245
Formation of a shock wave in a blade passage of a partial admission turbine, the ..B 555

TURBINES, GAS
Axial cascade technology and application to flow path designs
Part I—axial cascade technology .....P 309
Part II—application of data to flow path designs ..... P 329
Axial turbine performance evaluation
Part A—loss-geometry relationships ....P 341
Part B—optimization with and without constraints ..... P 349
Design of one-piece jet-engine compressor end seals ..... L 709
Fluidic technique for measuring the average temperature in a gas turbine exhaust duct, a ..... P 265
Heat transfer with film cooling near nontangential injection slots ..... P 157
Qualification of gas turbine engines for U.S. Navy shipboard use ..... P 361

TURBINES, HYDRAULIC. *See* POWER PLANTS, HYDROELECTRIC

TURBINES, MULTIPLE-DISK
Asymptotic solution for laminar flow of an incompressible fluid between rotating disks, an ..... AM 155

TURBINES, STEAM
Performance testing of 580-mw Joliet units No. 7 and No. 8 ..... P 65

TURBOPUMPS. *See* PUMPS

TURBOMACHINERY
Blade oscillations in one-stage axial turbomachinery ..... B 485
Dynamics of synchronous-precessing turborotors with particular reference to balancing. Part 2—application .....AM 25
Fluctuating lift forces on aerofoils moving through transverse and chordwise gusts ..... B 494
Gas-bearing turbomachinery ..... L 665
Laminar inward flow of an incompressible fluid between rotating disks, with full peripheral admission ..... AM 229
Pivoted-pad journal gas bearing performance in exploratory operation of Brayton cycle turbocompressor ..... L 687
Quasi two-dimensional flows through a cascade ..... P 119
Study of high speed machines with rubber stabilized air bearings, a ..... L 701
Three-dimensional calculation of flow in turbomachines with the aid of singularities ..... P 258
Vibration problems with high-speed turbomachinery ..... I 174

TURNING. *See* METAL CUTTING

U

UNDERWATER RESEARCH AND TECHNOLOGY
Fuel cell power plant for a deep diving submarine, a ..... I 261
Underwater power from aluminum .....I 255

UNNY, T. E.
Laminar two-dimensional free jet of an incompressible pseudoplastic fluid, the ..AM 810

URIBE, S.
Optimization of a slot end configuration in a finite plate subjected to uniformly distributed load ..... AM 403

V

VACHON, R. I.
Bubble trajectories and equilibrium levels in vibrated liquid columns .....B 125; (AC) ..... B 629
Evaluation of constants for the Rohsenow pool-boiling correlation ..... HT 239
Heat transfer to sulfur hexafluoride near the thermodynamic critical region in a natural-circulation loop ..... HT 37
Mathematical model for deposition from turbulent flows, a ..... P 164
Pool boiling on polished and chemically etched stainless-steel surfaces .....HT 231

VAHIDI, B.
Stability of shallow arches against snap-through under timewise step loads (D) ..... AM 618

VALTIERRA, M. L.
Mechanisms of wear in misaligned splines ..... L 42

VALVES
Differential pulse-length modulated pneumatic servo utilizing floating-flapper-disk switching valves, a ..... B 143

VAN DEVEN, D. E.
Low temperature evaluation of rear axle seals ..... L 489

VARIATIONAL METHODS
Variational method in engineering, the (BR) ..... AM 200

VASALOS, I. A.
Radiative transfer in anisotropically scattering media: allowance for Fresnel reflection at the boundaries ..... HT 56

VAUGHAN, D. R.
Application of distributed parameter concepts to dynamic analysis and control of bending vibrations ..... B 157

VAUGHAN, HENRY
Dynamic plastic buckling of sandwich shells ..... AM 539
Impulse buckling of an elastic-plastic cylinder containing an elastic core .....AM 827

VAUGHN, G. J.
Stress concentration factors in shouldered shafts subjected to combinations of flexure and torsion ..... I 301

VECTOR ANALYSIS
Generalized vector derivatives for systems with multiple relative motion .....AM 20; (D) ..... AM 840

VENER, H. L.
Proposed ASME performance test code for nuclear reactor fuel (D) ..... P 203

VENNETT, R. M.
Rosette, star, tensile fracture, the .....B 21

VIBRATION. *See also* OSCILLATION
Application of distributed parameter concepts to dynamic analysis and control of bending vibrations ..... B 157
Approximate theory governing symmetric motions of elastic rods of rectangular or square cross section, an ..... AM 333
Buckling and lateral vibration of drill pipe ..... I 613
Dynamic vibrations and stresses in elastic cylinders and spheres (errata) .....AM 430
Effect of local modifications on the vibration characteristics of linear systems ..AM 327
Flow-induced vibration and noise in tube-bank heat exchangers due to von Karman streets ..... I 134
Generalized hypergeometric function solutions on the transverse vibration of a class of nonuniform beams (D) .....AM 194
Gyroscopic drifts associated with rotational vehicle vibrations ..... AM 553
Interaction of a ring-reinforced shell and a fluid medium ..... AM 139
Inversion of the Laplace transform with applications to the vibrations of continuous elastic bodies, the ..... AM 837
Longitudinal and angular drill-string vibrations with damping ..... I 671
Nonlinear response of elastic plates to pulse excitations ..... AM 47
On inextensional vibrations of thin shells ..... AM 516
On the dynamic response of a beam to a randomly moving load ..... AM 1
On the single highest peak response of a dual oscillator to random excitation ..AM 414
On the unstable vibrations of a shaft with unsymmetrical stiffness carrying an unsymmetrical rotor ..... AM 313
On the vibrations of a laminated body ..AM 689
Parametric excitation of an axially moving string ..... AM 171
Parametric torsional stability of a bar under axial excitation .....AM 13; (D) ..... AM 841
Semilinear random vibrations in discrete systems ..... AM 560
Stability boundaries of the impact damper ..... AM 416
Steady-state dynamic response of a limited slip system ..... AM 322
Transient motion of a rigid cylinder produced by elastic and acoustic waves ..AM 134
Transverse vibrations of a shallow spherical dome ..... AM 402
Vibration of a rectangular plate carrying a concentrated mass ..... AM 411
Vibration of semi-infinite cylindrical shells ..... AM 178
Vibration problems with high-speed turbomachinery ..... I 174
Vibrations of beams carrying masses (D) ..... AM 845
Vibratory motion of a body on an elastic half plane ..... AM 697

VINOGRADOV, G. V.
Flow of greases under the action of complex shear ..... L 604
Gradient and time dependence of viscosity of polymer solutions in very viscous solvents (D) ..... L 578
On viscoelasticity ..... L 608

VISCOELASTICITY. *See also* LUBRICATION
Behavior of viscoelastic media under small sinusoidal oscillations superposed on finite strain ..... AM 433
Contact problems in the linear theory of viscoelasticity ..... AM 248
Mechanics of continua (BR) ..... AM 846
On obtaining solutions in nonlinear viscoelasticity ..... AM 129
On viscoelasticity ..... L 608
Viscoelastic properties of soft tissue by discrete model characterization ..... I 239
Viscoelasticity and its application to lubrication ..... L 543

VISHNEVSKY, C.
Study of the notch effect and of specimen design and loading on the fatigue properties of cast steel, a .....B 51; (AC) ..... B 411

VISKANTA, R.
Experimental examination of the validity of the commonly used methods of radiant heat transfer analysis, an ..... HT 429
Heat transfer by combined conduction and radiation between concentric spheres separated by radiating medium ..... HT 248
Simplified method for solving transient heat-conduction problems with nonlinear boundary conditions, a ..... HT 358

VOHR, J. H.
Experimental study of Taylor vortices and turbulence in flow between eccentric rotating cylinders, an .....L 285; (AC) .....L 644

VORTEX FLOW. *See* FLOW OF FLUIDS

VORTEXES. *See also* FLOW OF FLUIDS
Effects of streamwise vortices on laminar boundary-layer flow ..... AM 424
Experimental investigation of the formation and flow characteristics of an impulsively generated vortex street, an ..... B 596
Velocity distributions in two-phase vortex flow ..... B 368
Von Karman hydraulic vortexes cause stay vane cracking on propeller turbines at the Little Long generating station of Ontario Hydro ..... P 213

VYKUKAL, H. C.
Advanced developments in hard space suit technology ..... I 577

W

WAKES. *See also* AERODYNAMICS
Boundary effects in wake flow ..... AM 571
Near-wake of a circular cylinder in cross-flow, the ..... B 476
Numerical solution for the laminar wake behind a finite flat plate, a .....AM 625

WAKIM, J. M.
Present state of lubrication and its relation to rheology, the (D) ..... L 541

WAKIM (*Continued*)
Significant rheological characteristics of lubricants, the (D) ..... L 541
WALKER, W. F.
Numerical solution for the interaction of a moving shock wave with a turbulent mixing region ..... AM 220
WALLACE, H. W.
Liquid rocket engine feed system dynamics by the method of characteristics ..... I 561
WALLACE, J. F.
Study of the notch effect and of specimen design and loading on the fatigue properties of cast steel, a .....B 51; (AC) .....B 411
WALOWIT, J. A.
Microasperity lubrication ..... L 351
WAN, F. Y. M.
Pure bending of shallow helicoidal shells ..... AM 387
WANDRISCO, J. M.
Effect of design variation on service stresses in railroad wheels ....I 187; (AC) ....I 748
WANG, C. F.
Elastic contact of a strip pressed between two cylinders ..... AM 279
WANG, HAN-CHUNG
Approach to optimum shape determination for a class of thin shells of revolution, an ..... AM 524
Generalized hypergeometric function solutions on the transverse vibration of a class of nonuniform beams (AC) ..... AM 195
WANG, J. TING-SHUN
Interaction of a sloshing liquid with elastic containers ..... B 373
WANG, K. K.
Temperature responses and experimental errors for multitooth milling cutters ....I 353
WARD, E. G.
Forced convection in concentric-sphere heat exchangers ..... HT 125
WARNAKA, G. E.
Strain-frequency-temperature relationships in polymers ..... I 491
WARNER, CHARLES Y.
Turbulent natural convection from a vertical plane surface ..... HT 6
WASSELL, A. B.
Reynolds number effects in axial compressors ..... P 149
WASTE DISPOSAL. *See* INCINERATORS
WATER
Critical-heat-flux and flow-pattern observations for low-pressure water flowing in tubes (D) ..... HT 280
Stability of water flow over heated and cooled flat plates, the ..... HT 109
Water electrolysis: prospect for the future ..... I 531
WATER HAMMER
Frequency-dependent friction in transient pipe flow .....B 109; (D) .....B 413
Water-column separation at two pumping plants .....B 521
WATER PURIFICATION
Water reclamation by membrane vapor diffusion ..... I 569
WATERS, E. O.
Flat face flanges with metal-to-metal contact beyond the bolt circle (D) ..... P 296
WATERS, W. J.
High strength nickel-base alloy with improved oxidation resistance up to 2200 deg F, a ..... P 1
WAVE FUNCTIONS
Eigenvalue problem for two-dimensional regions with irregular boundaries, the (D) ..... AM 198
WAVE MECHANICS
Application of Kirchhoff's integral equation formulation to an elastic wave scattering problem (D) ..... AM 428
Asymptotic phase velocities in a two-layer plate, the ..... AM 162
Effect of temperature gradients on the propagation of elastoplastic waves ....AM 441
Elastic-plastic boundaries in combined longitudinal and torsional plastic wave propagation ..... AM 782
Elastic-plastic boundary in one-dimensional wave propagation, the ..... AM 812
Modified cylindrical wave approximation, a ..... AM 819
Motion of an elastic rod with external Coulomb friction ..... I 526
On stress pulse amplification ratio in truncated solid cones ..... AM 831
Unaxial wave propagation in a viscoelastic material using measured material properties ..... AM 449
Wave propagation in a finite length bar with a variable cross section ..... AM 824
WAVE PROPAGATION
Analysis of the propagation of plane elastic-plastic waves at finite strain (D) ..AM 427
Numerical solution for two-dimensional elastic wave propagation in finite bars (D) ..... AM 199
Time-harmonic waves in a stratified medium propagating in the direction of the layering ..... AM 408
WAZZAN, AHMED R.
Stability of water flow over heated and cooled flat plates, the ..... HT 109
WEAR
Lubrication review: a digest of the literature for 1966 ..... L 1
Measuring abrasiveness of solid fuels and other materials by a radiochemical method ..... P 186
Mechanisms of wear in misaligned splines ..... L 42
On the mechanism of contact between metal surfaces: part 2—the real area and the number of the contact points .....L 81; (D) ..... L 640
Spectrographic sampling method for quick assessment of cylinder and piston ring wear, a ..... I 43
WEATHERFORD, W. D., JR.
Mechanisms of wear in misaligned splines ..L 42
WEBB, W.
Some measurements of high pressure lubricant rheology (D) ..... L 590
WEBER, H. B.
Criterion for the control of 100 ton hopper car roll motion, a (D) ..... I 726
Suspension dynamics by computer simulation (D) ..... I 716
WEDEKIND, G. L.
Theoretical model for predicting the transient response of the mixture-vapor transition point in horizontal evaporating flow ..... HT 165
WEDGES
Edge-bonded dissimilar orthogonal elastic wedges under normal and shear loading ..... AM 460
WEINAND, L. H.
Helixseal—a practical hydrodynamic radial lip seal ..... L 433
WEISS, BEN-ZION
Effect of mean stress on fatigue crack propagation in plates under extension and bending, the (D) ..... B 414
WEISSENBURGER, J. T.
Effect of local modifications on the vibration characteristics of linear systems ..AM 327
WELLS, C. H.
Control of buildup and diametral growth in shear forming, the ..... I 63
WELNA, H.
Application of controlled-vortex aerodynamics to advanced axial flow turbines, the ..... P 245
WEMPNER, G. A.
Motion of an elastic rod with external Coulomb friction ..... I 526
WENGLARZ, R. A.
Gyroscopic drifts associated with rotational vehicle vibrations ..... AM 553
WERDEN, A. C., JR.
Proposed ASME performance test code for nuclear reactor fuel (D) ..... P 203
WESTMANN, R. A.
Torsion of a cylindrical rod welded to an elastic half space (D) ..... AM 197
WHEELS
Effect of design variation on service stresses in railroad wheels .....I 187; (D) ..... I 746
WHITELAW, J. H.
Effect of slot height and slot-turbulence intensity on the effectiveness of the uniform density, two-dimensional wall jet, the ..... HT 469
Some properties of the two-dimensional turbulent wall jet in a moving stream ..AM 641
WHITTIER, J. S.
Transverse vibrations of a shallow spherical dome ..... AM 402
WIDNER, R. L.
Identification of potential failure nuclei in rolling contact fatigue (D) .....B 628
Role of lubrication in propagation of contact fatigue cracks, the .....L 89; (AC) ..... L 632
WIEBE, D.
Effects of the lateral instability of high center of gravity freight cars, the .....I 727
WIERZBICKI, T.
Analysis of the propagation of plane elastic-plastic waves at finite strain (AC) ....AM 427
WILCOCK, D. F.
Behavior of hydrostatic and hydrodynamic noncontacting face seals ..... L 510
Considerations of flow across a bearing groove (D) ..... L 660
Design of floated shoe close clearance seals for supersonic jet engine compressors ..L 500
Design of one-piece jet-engine compressor end seals ..... L 709
Externally pressurized bearings—II: vibration attenuators ..... L 614
WILDHABER, ERNEST
Toothed couplings—analysis and optimization (D) ..... I 434
WILDMANN, M.
Axisymmetric, perfectly flexible foil bearing with porous inlet restrictor, the .....L 145; (AC) ..... L 640
Dynamic behavior of a foil in the presence of a lubricating film ..... AM 242
On the behavior of grooved plate thrust bearings with compressible lubricant ..L 226
WILLIAMS, F. J.
Investigation of permanent deformation (brinelling) of ball and roller specimens, an ..... L 618
WILLIAMS, M. C.
Gradient and time dependence of viscosity of polymer solutions in very viscous solvents (D) ..... L 577
WILLIAMS, R.
Computerized determination and analysis of cost and production rates for machining operations. Part 1—turning .....I 455
WILLIS, N. C., JR.
Analysis of three-fluid, crossflow heat exchangers ..... HT 333
WILMS, E. V.
Motion of an elastic rod with external Coulomb friction ..... I 526
WILSON, D. J.
Film cooling with normal injection into a supersonic flow ..... I 584
WILSON, E. A.
Area of contact between rough surfaces and flats, the (D) ..... L 521
WILSON, N. W.
Analysis of heat transfer for fully developed turbulent flow in concentric annuli, an ..... HT 43
WINER, W. O.
Present state of lubrication and its relation to rheology, the (D) ..... L 540
Significant rheological characteristics of lubricants, the (D) ..... L 540
Some measurements of high pressure lubricant rheology ..... L 580
WINGS
On the calculation of unsteady nonlinear three-dimensional supersonic flow past wings ..... B 581
WINN, L. W.
Design of one-piece jet-engine compressor end seals ..... L 709
WIRE DRAWING. *See* METAL DRAWING
